Address: _____

Alterations within an Existing Building that affect a Primary Function Area.

In existing buildings, where an alteration affects the usability of or the access to an area containing a primary function*, the route to the primary function area shall be accessible. The accessible route to the primary function area shall include toilet facilities and drinking fountains serving the area of primary function. However, the cost of providing the accessible route is not required to exceed 20 percent of the costs of the alterations affecting the area of primary function.

The applicant shall check the appropriate box below.

The plans included with this application provide the required accessible route to the primary function area which includes toilet facilities and drinking fountains.

The plans included with this application provide the required accessible route to the primary function area which includes toilet facilities and drinking fountains subject to the 20% cost limit. The following elements shall be added or altered to create an accessible route to the primary function area:

Elements added/altered:

The proposed alterations do not obligate me to provide an accessible route to the altered area. (State reason): _____

Signature of Owner or Owner's Agent _____

Printed Name _____

***Primary Function is defined as follows:** A *primary function* is a major activity for which the facility is intended. Areas that contain a *primary function* include, but are not limited to, the customer services lobby of a bank, the dining area of a cafeteria, the meeting rooms, as well as offices and other *work areas* in which the activities of the public accommodation or private entity using the facility are carried out. Mechanical rooms, boiler rooms, supply storage rooms, employee lounges or locker rooms, janitorial closets, entrances, corridors and restrooms are not areas containing a *primary function*.
