

Asbestos Inspection Certification for Building Renovations and Demolition

Permit Number: _____

Building Address: _____

Specific Area of Work: _____

I certify that the affected portions of the building are either exempt* or have been inspected for the presence of asbestos by an individual licensed to perform such inspections as required by § 54.1-503 (Code of Virginia) and that appropriate response actions will be undertaken in accordance with the requirements of the Clean Air Act National Emission Standard for the Hazardous Air Pollutant (NESHAPS) (40 CFR 61, Subpart M), the asbestos worker protections established by OSHA (29 CFR 1926.1101), and 40 CFR Part 763 and subsequent amendments, as applicable.

Where asbestos response actions are taken, no asbestos abatement area will be reoccupied until all response actions have been completed and final air monitoring clearances have been measured.

* Asbestos inspection is not required if the permit for the initial construction of the building was issued after January 1, 1985, or for single-family dwellings or residential housing with four or fewer units unless the renovation or demolition of such buildings is for commercial or public development purposes, or if the combined amount of regulated asbestos-containing material involved is less than 260 linear feet on pipes, or less than 160 square feet on other facility components, or less than 35 cubic feet of facility components where the length or area cannot be measured.
