

# Paper Weaving Fish

<https://kidscraftroom.com/paper-weaving-fish-craft/>

**Time Required:** 20-30 minutes

**Prep Required:** Print out template

**Space (s) Needed:** Indoors

## Materials:

Printable fish template

Colored paper to print template on

Glue

Scissors

Black marker

Cupcake liners

## Prep:

1. Print out your fish template or draw your own

## Instructions:

1. Cut the fins off the template and draw around the fish body onto colored paper.
2. Lightly fold the fish in half and snip straight lines from the fold towards the edge of the fish. Be careful not to cut right to the edge though. (Leave about an inch.)
3. Use scissors to cut strips of your colored paper for weaving.
4. Weave the paper strips under and over the cut lines you made in the fish.
5. Cut the fisheye from your template and glue it on.
6. To make fins for your woven fish draw around the fin template onto cupcake liner and cut them out. Their corrugated sides are just perfect for fins!
7. Finish off your paper weaving fish craft by gluing on the fins and drawing on some eyes and detail to the tail.
