DEFINING THE 1991 3-C REPORT

The Continuing, Comprehensive and Coordinated (3-C) Transportation Study is an annual report prepared by the Henrico County Planning Office. By tracking Certificates of Occupancy, Subdivision Approvals, Plans of Development and other sources of information, data is obtained on current population and land use. The data is then used for regional transportation demand forecasting, as well as other purposes.

The report is divided into two parts: (1) Population and Housing, and (2) Land Use in Acres. The following describes some of the terms used in this report.

PART I - POPULATION AND HOUSING

Total Population is the Single Family, Multifamily and Group Quarter Populations added together.

Single Family Population and *Multifamily Population* are figures based on the number of housing units, the vacancy rate (both single family and multifamily vacancy rates) and the average household size.

Group Quarter Population consists of the number of residents in nursing homes, prisons or college dormitories.

Single Family Housing Units are detached units and mobile homes which may be either owner or renter occupied.

Multifamily Housing Units are attached units, either owner or renter occupied. Multifamily units consist of apartments, residential townhouses for sale, condominiums, cooperatives and duplexes.
