August, 2004
Henrico County Planning Office

METHODOLOGY FOR THE 2003 UPDATE OF THE CONTINUING, COOPERATIVE AND COMPREHENSIVE (3-C) TRANSPORTATION STUDY FOR HENRICO COUNTY

The Continuing, Cooperative and Comprehensive Transportation Study data is divided into two (2) parts: (1) Population and Housing and (2) Land Use in Acres.

PART 1 - POPULATION AND HOUSING

The Population and Housing data was calculated in accordance with the Population and Housing Model prepared by the Richmond Regional Planning District Commission. Housing unit data for single family and multi-family dwellings was added by traffic zone to the 2002 housing unit data to obtain a 2003 housing unit count. A County vacancy rate was calculated and an average household size factor was applied to obtain the 2003 population count. The following briefly describes the terms and methods used to determine 2003 housing and population totals for Henrico County.

HOUSING

Single Family Housing Units are detached dwelling units and mobile homes either owner or renter occupied.

Multi-family Housing Units are attached and semi-detached dwelling units either owner or renter occupied. Multifamily housing units include apartments, townhouses, semi-detached townhouses, condominiums, detached condominiums, cooperatives and duplexes.

- The number of single family and multi-family housing units is tallied by traffic zone annually by sorting and categorizing certificates of occupancy.

Group Quarters include nursing homes with common eating facilities, prisons, school dormitories, group homes for the Mentally Challenged, and other facilities housing unrelated individuals for extended periods of time.

- Plans of development files and certificates of occupancy are crosschecked for additional group quarter dwelling units in the County. A survey of existing and new group quarter facilities was taken as of December 31, 2003 to determine the Group Quarters population. Many

Group Quarters facilities that had been omitted in previous years were added to the Group Quarters population for 2002.

Demolitions are dwelling units that have been disconnected from public utilities and razed.

- The number of demolitions is obtained annually from the Office of Building Inspections. The office of Building Inspections reports demolitions by traffic zone. The demolition totals are subtracted by traffic zone from the appropriate Land Use category.

Vacancy Rates

The 2003 Single-Family Vacancy Rate is estimated at 1.4%.

The 2003 Multi-Family Vacancy Rate is estimated at 6.6%.

Average Household Size

The 2003 Average Household Size is 2.39 Persons Per Household.

Population for the county is derived by multiplying the average household size (2.39) by both the number of single-family and the number of multifamily dwelling units in the County, less the vacancy rate. The Group Quarters population is added to this total.

*Note: A new benchmark was created in 2000 based on data from the 2000 U.S. Census.

Part II - LAND USE IN ACRES

The Total Acreage of Henrico County is grouped into nine (9) categories for the 3C Transportation Data Report: Single Family, Multifamily, Group Quarters, Industrial, Miscellaneous, Commercial, Public and Semi-Public, Vacant Land and Water Areas. The Total Acreage for each traffic zone is the sum of the acreage in all nine categories and remains constant unless traffic zone boundaries change. These categories are defined as follows:

<i>Single Family</i>	Detached housing units and mobile homes.
<i>Multi-family</i>	Apartments, townhouses, semi-detached townhouses, condominiums, detached condominiums and duplexes.
<i>Group Quarters</i>	Nursing homes with common dining facilities, prisons, school dormitories, group homes for the mentally challenged, and other facilities housing unrelated individuals for extended periods of time.
<i>Industrial</i>	Manufacturing, assembling, processing, distribution and storage of products made from previously prepared basic materials.
<i>Miscellaneous</i>	Rights-of-way, utilities, transportation and communication facilities.
<i>Commercial</i>	Retail sales, service establishments and offices.
<i>Public/Semi-Public</i>	Churches, schools, libraries, parks, government offices and other public and semi-public uses.
<i>Water Area</i>	Rivers, lakes, manmade lakes, ponds and other bodies of water.
<i>Vacant Land</i>	Unoccupied lots or parcels. Includes land being used for agricultural purposes.

Changes and transfers in land uses are reported by traffic zone utilizing certificates of occupancy. When a change in land use occurs, the exact amount of acreage is subtracted from the previous land use category and added to the present land use category. Transfers of property and past and present uses of parcels of land that fall under the same category have no affect on the results of this report.

When a Plan of Development (POD) is approved, the acreage included in the POD is subtracted from the current land use category and added to the new land use category. For example, if a 20-acre parcel includes a POD containing 5 acres - only the 5 acres are subtracted from the current land use category and added to the new one. When a POD is revised, a determination is made whether additional acreage should change land use categories. It is possible for acreage to change categories more than once.

The amount of acreage moved from "Vacant Land" to either the "Single Family" or the "Multifamily" categories annually is calculated by multiplying the number of completed dwelling units, as reported by the Certificates of Occupancy, by the average lot size for the subdivision or multi-family development. The average lot size of all subdivisions and residential townhouse developments approved since 1959 are available and are included in 3-C data input available through the planning office.

The acreage for a single family dwelling unit not located in a subdivision is determined by doubling the minimum acreage requirement for the zoning classification, unless the lot is less than double the minimum. In that case the actual acreage is used. For example, if a house is built on 10 acres of land in an A-1 zoning classification which requires a minimum lot size of one acre, only two (2) acres (double the minimum lot size for A-1) is moved from the vacant land use category to the single family residential land use category.
