2. Any mechanical equipment, water tanks or other accessory devices placed at the top of any structure or building shall be architecturally treated to shield said devices so as to minimize visual and audible impact to adjacent properties.

4. No structure or building on the subject parcel shall have any side abutting or reasonably visible to the property's southern boundary line illuminated and all other exterior lighting shall be shielded, low profile and of low intensity so as to minimize any illumination of adjacent property to the west and south of subject parcel except as required by the County of Henrico.
