# Soil and Water Conservation Districts

## The VASWCD Educational Foundation Mission

The Virginia Association of Soil and Water Conservation Districts Educational Foundation is nonprofit and classified as a 501(c)(3) organization that was established in 1990. The VASWCD Educational Foundation provides and promotes leadership in the conservation of natural resources through stewardship and education programs. Funding for activities such as Envirothon is provided through donations made by individuals, corporations, organizations and other foundations as well as fundraising efforts. Contributions to the VASWCD Educational Foundation are used to support educational efforts within the Commonwealth.

There are 47 Soil and Water Conservation Districts serving localities throughout the Commonwealth of Virginia. Governed by a board of directors of local citizens, districts work hand-in hand with state, federal and county agencies, other conservation organizations, schools, and many community partners to achieve their conservation objectives.

Districts offer many educational programs which target a variety of audiences. Emphasis is on education programs based on the VA Standards of Learning. Resources include activities, games, models, videos, skits, and more. Many districts also have a variety of resources available to teachers and scout leaders.

Contact information for the Soil and Water Conservation District serving each of the Girl Scout Commonwealth Councils counties can be found on the following pages.

# The Conservation Poster Contest

The annual Conservation Poster Contest provides kindergarten through twelfth grade students an opportunity to convey their thoughts about soil, water and related natural resource issues through art. It also highlights the educational outreach efforts of conservation districts and their state conservation associations, auxiliaries and agencies. The poster contest theme follows the annual National Association of Conservation Districts (NACD) Stewardship theme.

Each year, the poster contest starts at the district level. The contest is open to public, private or home school students, girl scout/boy scout troops, 4H Clubs, etc. Individuals and teachers with questions regarding district contests should contact their local district. To locate your local district search our online SWCD Directory or contact the VASWCD. District winners advance to the state level. Local SWCDs forward their local winning poster entries to the VASWCD office for consideration at the state level. Finally, state winners advance to the National Contest. National winners are recognized each year at the NACD Annual Meeting.

## **Poster Categories by Grade:**

- K-1
- 2-3
- 4-6
- 7-9
- 10-12

## 2020 Contest Theme

Pollination is the transfer of pollen from one flower to another of the same species. This transfer is necessary for the production of seeds and fruits, and helps to ensure the genetic variability that is vital to healthy plant populations.

Plants are either pollinated by wind or through the actions of animals. Plants that are pollinated primarily by wind produce small grains of pollen that can be easily carried some distance through the air. Because movement of pollen from one flower to another by wind is somewhat haphazard, wind-pollinated plants usually produce a lot of small pollen grains that can be easily carried in the wind (think of that yellowish dust all over your car in the spring—the pollen from trees). Also, since they are not trying to attract animals to move the pollen, wind-pollinated flowers tend to be small and drab.

Animal-pollinated plants have a mutually beneficial relationship with their animal pollinators. Plants provide food in the form of nectar and in the process of collecting that resource, the animal moves pollen from flower to flower. Both sides benefit. Animal-pollinated flowers also advertise themselves through attractive colors, shapes, and scents.

Many of the foods we eat depend on animal pollinators. Most of these are foods give our diet variety and flavor. Examples include tree fruits like apples, peaches, and oranges; tomatoes, berries, and spicy foods like chili peppers .

Without pollinators, these plants could not produce seeds and fruit, and would eventually disappear because they could no longer reproduce. All the other organisms that depend on these plants for food and shelter would also eventually disappear. Some plants today are in danger of becoming extinct because they lack sufficient pollinators. Pollinators need our help!

# Earning the Patch

The VASWCD conservation poster contest is open to all Girl Scouts. Girls must complete all 5 activities to earn the patch.

1. Almost every locality in Virginia is served by a Soil and Water Conservation District. Look at pages 3-4 of this booklet for the name of the soil and water conservation district serving your county. Cities are usually served by the districts in the counties surrounding them.
2. Find out what soil and water conservation districts do. Type the name of your district in your search engine and explore the programs offered by your soil and water conservation district.
3. One of the programs offered across Virginia is the Conservation Poster Contest. Each year the contest has a new theme. Visit the VASWCD website ([www.vaswcd.org](http://www.vaswcd.org)) for the current theme and contest rules.
4. Invite a member of your local SWCD or another environmental group to visit your troop and talk about the current poster contest theme. Contact information is available by visiting the VASWCD website ([www.vaswcd.org](http://www.vaswcd.org)). You may also complete this step by researching the topic on your own using the resources offered in this booklet on pages 10-11.
5. Create a poster reflecting the contest theme and submit it to your local SWCD. Winners at the local level will advance to a state competition. Winners of the state competition are sent to the National Association of Conservation Districts for a national competition. GOOD LUCK!

# Poster Contest Rules

Following are the rules for the national conservation poster competition. Entries should be submitted to your local Soil and Water Conservation District office. Contact your local district office to determine local deadlines.

- Any media may be used to create a flat or two-dimensional effect (paint, crayon, colored pencil, charcoal, stickers, paper or other materials on regular posters.
- In Henrico County, the poster size must be between 11"x17".
- Posters should be packaged so they remain flat when sent for judging.
- All posters must be created by an individual student rather than a team of students.
- The 2020 Stewardship title **"Where would we BEE without Pollinators"** must be on your poster. This is the only title eligible for the national poster contest.
- Each entry must have a signed entry form completed and signed by a parent or guardian to be eligible for judging. Entry forms are available from your local SWCD.
- Although younger students will most likely receive help in planning from parents or teachers, each student is encouraged to do as much of the work as possible by him/herself. Entries completed by students in their handwriting and coloring will score better than those designed, drawn and colored with adult assistance.
- Each entry must be judged at each conservation district's or area contest prior to the state contest. Check with your local Soil and Water Conservation District for your local contest due date. Winners at the local level advance to the state contest. Winners in each category at the state level will then proceed to the national contest.

# Steps to a Great Poster!

- Research the theme topic.
- Decide on the information to include on your poster.
- Sketch out your idea.
- Lightly mark guidelines for lettering.
- Clean up your poster so it is neat. Erase any guidelines that are showing.
- Complete the poster entry form, be sure it is signed by a parent or guardian and attach it to the back of your poster. Turn in your poster on time.
- Entries must be the contestant's original, hand-done creation. It may not be traced from photographs or other artists' published works.
- Any media may be used to create a flat or two-dimensional effect (paint, crayon, colored pencil, charcoal, paper or other materials).
- You should not:
  - Laminate your poster
  - Use staples, tacks or tape.
  - Use fluorescent poster board
  - Create a poster that is all words or all pictures

# The Patch!

Those Girl Scouts that have submitted a poster by the local SWCD deadline and adhere to the rules and activities listed on page six and seven of this Leaders' Guide are eligible to receive the VASWCD Conservation Poster Patch. Scouts or Troop Leaders will receive their patch through their local Soil and Water Conservation District in a timely manner once posters have been submitted and processed.

Patches are provided free of charge to Girl Scouts completing the poster program per the enclosed guidelines. This Patch Program is sponsored by the Virginia Association of Soil and Water Conservation Districts Educational Foundation.
